Coaxial digital audio output
The R6 III supports coaxial digital output via its type-c port. This may be adapted to regular RCA connectors via our Type-C->RCA interconnect, available at store.hiby.com or one of the various retail partners listed at the end of this document.

USB Digital audio output
Connect USB DAC / amps to the R6PRO MAX USB type-C port.

File transfer: connect the R6PRO MAX to the computer via the provided USB type-C cable. After this, pull down the notification shade on the R6PRO MAX, scroll down to the bottom and tap twice on "USB for charging", then select "File transfer" in the menu. Now the R6PRO MAX will function as an MTP storage device for file transfer. On a Mac it is necessary to also install Android File Transfer to enable MTP file transfer.

Acting as USB DAC
a.connect the R6PRO MAX to the computer via the provided USB type-C cable. After this, pull down the notification shade on the R6PRO MAX, scroll down to the bottom and tap twice on "USB for charging", then select "USB DAC in" in the menu.
b.On windows 7 it would be necessary to install the USB audio driver for this; go to store.hiby.com -> Scroll to bottom -> Click "download" under Support -> "USB DAC Driver & Guidance" -> "HiBy R6PRO MAX USB DAC Driver Download and Installation Guide"

Wireless connectivity

2.WiFi
The R6PRO MAX supports both 2.4GHz and 5GHz WiFi. Apart from using it to connect it to the internet for music streaming, internet etc., it can also be used for music transfer, remote control via HiByLink and/or playing music from network resources via DLNA / LAN etc.

Fireware update
Over-the-air online update
1.Updating automatically via WiFi is recommended.
2.The R6PRO MAX will automatically detect updates and prompt about the update in the notification shade if an update is found.

Direct Transport Audio architecture for lossless digital audio on Android
1. DTA (Direct Transport Audio) is the name of HiBy's full-time bitperfect android audio framework; it bypasses Android's sample rate conversion by modifying its audio stack to output bitperfect audio;

2. The HiByMusic app bundled with the R6PRO MAX may bitperfectly output up to and including DSD1024 / PCM 768kHz/32bit, however many third party apps assume bad Android resampling and will conduct "high quality" resampling internally, in which case it is impossible to obtain bitperfect audio from such apps despite DTA.

PD3.1 charging protocol
R6PRO MAX supports PD3.1 charging protocol. It is recommended to charge the R6PRO MAX with a USB PD charger; other chargers may cause charging failure or charging slowness.
